DETAILED ACTION

Receipt is acknowledged of applicant's IDS filed on 21 July 2005.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is indefinite due to improper form of the Markush claim language. Markush claims are, for example, in the following form: "a compound selected from the group consisting of A, B and C." Since the applicants do not use proper Markush form, it is not known whether applicants intend to use multiple disintegrating agents or a single disintegrating agent.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Mizumoto, et. al. (U.S. Patent No. 5,576,014).

Mizumoto, et. al. disclose an intraorally rapidly disintegrating tablet (see col. 1, lines 9-28).

The disclosed tablet is the instant tablet as claimed:

- the core granule (comprising a medicament and a sugar) coated with a pharmaceutical disintegrating agent of instant claim 1 (see col. 7, lines 19-46; col. 13, lines 39-43);
- the disintegrating agent of instant claim 2 (see col. 6, lines 23 and 24);
- the sugar of instant claim 3 (see col. 7, lines 19 and 20);
- the average particle diameter of instant claim 4 (see col. 7, lines 50 and 51); and
- the tablet thickness of instant claim 5 (see col. 5, line 37).
